PROFESSIONAL SUMMARY

A BSc.CSIT graduate and Junior Backend Developer with practical experience in system maintenance, database support, and application troubleshooting. Proficient in diagnosing software bugs, maintaining server reliability, and configuring Windows and Linux environments. Capable of delivering reliable technical support and maintaining digital infrastructure effectively.

EDUCATION

Bachelor's in Computer Science and Information Technology (BSc.CSIT)

February 2026

Nagarjuna College of Information Technology (NCIT) | Lalitpur, Nepal

Higher Secondary Education (+2) — Science

2078 BS (2021 AD)

Total Score: 3.66 GPA

Secondary Education Exam (SEE)

2075 BS (2019 AD)

Total Score: 3.45 GPA

PROFESSIONAL EXPERIENCE

Junior Backend Developer

Ripplebytes Solutions Pvt. Ltd, Kathmandu, Nepal

5 Months Experience (Real-world Project Implementation)

- Developed and maintained backend software, ensuring system reliability and consistent operational uptime.
- Troubleshoot and resolved application bugs, functional errors, and API execution issues to minimize system downtime.
- Supported database administration tasks, including basic data management, query adjustments, and routine backup checks.
- Collaborated with project team members using Git and GitHub to manage software updates and track system changes.
- Documented installation processes, system configurations, and troubleshooting steps to assist with technical support workflows.

TECHNICAL SKILLS

Operating Systems: Windows, Linux (Ubuntu, Fedora distributions)

Backend & Programming: Python, JavaScript, Golang

Databases: MySQL, PostgreSQL, MongoDB, Database Maintenance, Data Backup Basics

Tools & Platforms: Git, GitHub, Postman, Swagger / OpenAPI, VS Code, Go toolchain, pgAdmin, MongoDB Compass

IT Support & Networking: System Troubleshooting, Software Installation, Hardware Maintenance, LAN Fundamentals

TECHNICAL PROJECTS

SujhavMitra — Recommendation System Project

- Developed recommendation filtering logic using a Python (Flask) backend linked to a React user interface.
- Configured and managed the MySQL database structure to ensure reliable data retrieval and processing.

Barcode / PDF417 Reader — Web Application

- Built a web tool that processes image scanning inputs using Python backend scripts and a React frontend.
- Implemented REST API endpoints to transfer data between the user interface and backend processing layers.

KEY COMPETENCIES

Problem-solving: Methodical approach to finding faults and fixing application, operating system, and hardware errors.

Communication: Ability to explain technical setups clearly to non-technical users and collaborate on administrative tasks.

Teamwork: Experienced in working within collaborative development environments and coordinating tasks directly with teammates.

Adaptability: Quick to learn new software platforms, internal database rules, and administrative workflows.
